Comments The attached garage on this home was converted into living space and the floor level has been raised to match that of the original living space. That elevation is shown in C2a. Two vents exist providing opening into the space between the raised floor of the garage and the ground with unobstructed opening area of 312 sq. inches. It appears that the slab of the garage has been removed prior to the reconstruction. There are 9 vent openings into the crawl space under the original portion of the home, all unobstructed as per A8.c.
